TO:

Users of the NIH Data Book

FROM:

Acting Deputy Director for Science Policy and Technology Transfer

SUBJECT:

NIH Data Book (Basic Data Relating to the National Institutes of Health), 1994

The Office of Science Policy and Technology Transfer, with the invaluable assistance of the NIH Division of Research Grants, and data supplied by other NIH and Federal offices, has again compiled the *NIH Data Book*. Since 1961, the *Data Book* has been published annually as a ready source of financial information on NIH programs and related Federal and national activities. It is available to NIH staff and others interested in NIH budget issues and health R&D policy.

In Fiscal Year 1993, three research institutes, the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, and the National Institute of Mental Health, were transferred to the NIH from the former Alcohol, Drug Abuse, and Mental Health Administration. In this edition of the *Data Book*, data for these institutes have been added into the ten previous years wherever possible. When the specific lines of the tables could not be matched, total figures were added. In addition, three new tables have been added to the *Data Book*: one shows the numbers of adolescent cases of AIDS by gender, race/ethnicity, and exposure category (Table 49); and two show research grants by race (Table 32) and gender (Table 33) of the principal investigator or program director. Also, NIH awards tables presented by type of award were expanded to include data on contracts, training, and construction (Tables 19 and 20).

Suggestions and questions on any aspect of the *Data Book* should be directed to the Office of Strategic Planning and Evaluation, OSPTT (301-496-9291).

Daryl A/(Sandy) Chamblee, J.D.

<sup>&</sup>lt;sup>a</sup> Revised.

b These figures report support for the direct conduct of biomedical research. In addition, HHMI's Office of Grants and Special Programs provides support for scientific career development, which is not included here.

c Total includes only eight months of operations due to change in fiscal year.

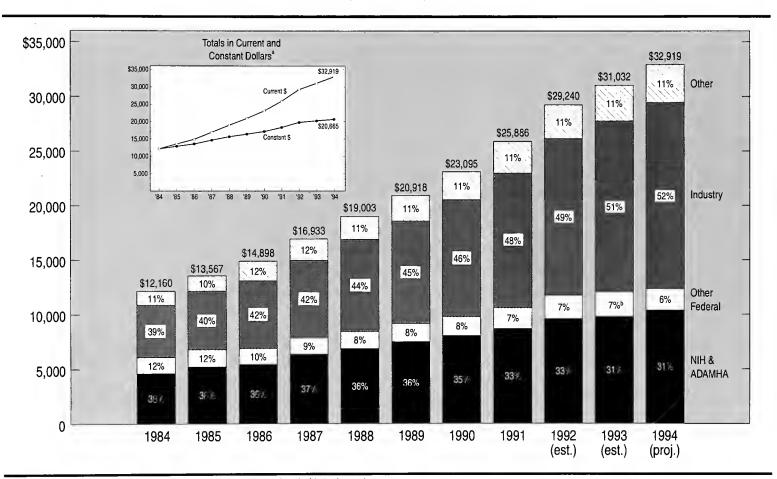

<sup>&</sup>lt;sup>d</sup> In addition to in-house research, includes program management and direct operations attributable to health R&D.

<sup>&</sup>lt;sup>e</sup> Includes Federally Funded R&D Centers.

Figure 2.1

#### National Support for Health R&D by Source, 1984-1994

(Dollars in Millions)

<sup>&</sup>lt;sup>a</sup> FY 1984=100. Constant dollars based on Biomedical R&D Price Index (see inside back cover).

<sup>&</sup>lt;sup>b</sup> Decrease in 1993 reflects transfer of NIAAA, NIDA, and NIMH from ADAMHA into NIH.

<sup>&</sup>lt;sup>a</sup> An agreement between a Federal laboratory and one or more collaborators (usually private corporations, but may also be State and local governments and nonprofit institutions), who for a designated period of time provide personnel, services, intellectual property, or information toward a joint research project. As an incentive for participation, the collaborating party may be granted, in advance, an exclusive right to license any resulting invention. The purpose of the CRADA is to make Federal facilities, scientilic know-how, and existing intellectual property available for collaborative interactions with industry scientists, and for development of scientific and technological knowledge into useful, marketable products.

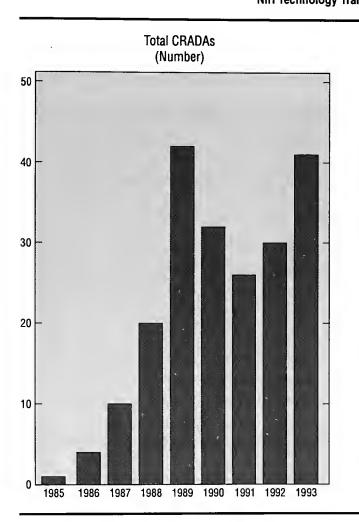

Source: Office of Technology Transfer, OSPTT

<sup>&</sup>lt;sup>b</sup> Counts based on execution date of license.

c Includes one-time catch-up payment of \$6.2 million.

<sup>&</sup>lt;sup>a</sup> In 1987, NIAMS, NIDDK, and NCNR appropriations were new.

Source: Office of Financial Management (Continued)

<sup>&</sup>lt;sup>b</sup> In 1989, NIDCD and NINDS appropriations were new.

c In 1990, NCHGR appropriation was new, and DRR was reorganized and renamed NCRR.

d In 1993, ADAMHA was reorganized and renamed SAMHSA, and its three research institutes were transferred to NIH. Also, NCNR was made an institute and renamed NINR.

e Includes AIDS funds appropriated to OD but transferred out to be awarded and administered. Also includes funds for NCNR which were administered under OD in 1986,

<sup>&</sup>lt;sup>e</sup> Total NCI prevention research funding. Primary prevention (which excludes biological carcinogenesis and some chemical and physical carcinogenesis research) is \$260 million in FY 1990, \$293 million in FY 1991, \$318 million in FY 1992, and \$323 million in FY 1993.

Source: Division of Disease Prevention, ODP, OD

<sup>&</sup>lt;sup>b</sup> Beginning in 1992, reflects categorization of additional programs under prevention research.

<sup>&</sup>lt;sup>c</sup> Beginning in 1992, includes contract funding for the Women's Health Initiative.

b Includes reimbursements where applicable (funds appropriated to OD but transferred to Institutes to be awarded and administered).

c In FY 1993 the three research institutes of ADAMHA were transferred to NIH, and ADAMHA was renamed the Substance Abuse and Mental Health Services Administration (SAMHSA).

<sup>&</sup>lt;sup>d</sup> In FY 1993 NCNR was made an institute and renamed NINR.

<sup>&</sup>lt;sup>a</sup> Excludes NLM and DRR (included under Other research), but includes NCRR starting in FY 1990.

Source: Information Systems Branch, DRG (Continued)

b P41 for NIGMS only.

c R55 for 1993 only; for prior years, included under Other research.

d Excludes NLM (included under Other research).

D42, R03, R12, R13, R15, R18, R19, R21, R24, R25, R26, R55 (prior to FY 1993), S15, U13, U18, U26, and U45 for all ICDs. Also, for DRR (prior to 1990) and NLM only, includes P41, P50, R01, R23, R29, R43, R44, U24, and U50. For NCRR only, includes U24. For FIC only, includes U01. For NCNR in FY 1986 only, includes P01, R01, and R23.

Source for contracts awarded by NIAAA, NIDA, and NIMH in FY 1984-1992: Division of Financial Management.

<sup>&</sup>lt;sup>a</sup> R&D contracts awarded by NIAAA, NIDA, and NIMH are included in totals only lor years prior to FY 1993 because they are not available by kind of performing institution.

Source: Information Systems Branch, DRG (Continued)

b Includes all hospitals owned by these institutions.

c Includes basic health-science departments administered by schools of medicine or medicine/dentistry.

d Less than 0.05 percent.

<sup>&</sup>lt;sup>e</sup> Hospitals not owned by institutions classified as higher education, government, or research institutes.

Awards to U.S. citizens working abroad as well as to foreign nationals.

a A multicampus university (including its components) is counted as one; separately organized components of a university system are counted individually.

Source: Information Systems Branch, DRG (Continued)

b Includes hospitals owned by these institutions.

c Includes basic health-science departments administered by schools of medicine or medicine/dentistry.

d Less than 0.05 percent.

<sup>&</sup>lt;sup>e</sup> Hospitals not owned by institutions classified as higher education, government, or research institutes.

Awards to U.S. citizens abroad as well as to foreign nationals.

<sup>&</sup>lt;sup>a</sup> Includes all hospitals administered by these institutions.

Source: Information Systems Branch, DRG (Continued)

b Includes basic health-science departments administered by schools of medicine and medicine/dentistry.

<sup>&</sup>lt;sup>c</sup> Hospitals not administered by institutions classified as higher education or research institutes.

d Awards to U.S. cilizens working abroad as well as to foreign nationals.
CC, DRG, OD, and Women's Health Initiative.

a Represents total costs, except that supplements to prior years' grants are excluded.

Source: Information Systems Branch, DRG (Continued)

b P41 for NIGMS only.

c R55 for FY 1993 only; for prior years, R55 included below under Other research.

<sup>&</sup>lt;sup>d</sup> D42, R03, R12, R13, R15, R18, R19, R21, R24, R25, R26, R55 (prior to FY 1993), S15, U13, U18, U26, and U45 for all ICDs. Also, for DRR (prior to 1990) and NLM only, includes P41, P50, R01, R23, R29, R43, R44, U24, and U50. For NCRR only, includes U24. For FIC only, includes U01.

<sup>\*</sup> For NCNR in FY 1986 only, includes P01, R01, and R23.

<sup>&</sup>lt;sup>1</sup> Excludes contracts awarded by NIAAA, NIDA, and NIMH in years prior to FY 1993 because data are not available.

<sup>9</sup> FY 1984=100. Constant dollars are based on the Biomedical R&D Price Index (see inside back cover).

a Represents total costs, except that supplements to prior years' grants are excluded.

Source: Information Systems Branch, DRG (Cantinued)

b FY 1984=100. Constant dollars are based on the Biomedical R&D Price Index (see back inside cover).

c R55 for FY 1993 anly.

d R03, R12, R13, R15, R18, R21, R24, R25, R26, S15, U13, U18, U26, and U45 for all ICDs. Also, for DRR (in 1984) and NLM only, includes P41, P50, R01, R23, R29, R43, R44, U24, and U50. For NCRR only, includes U24. For FIC only, includes U01.

<sup>&</sup>lt;sup>6</sup> Excludes contracts awarded by NIAAA, NIDA, and NIMH in FY 1984. Data are not available for years prior to FY 1993.

DRS, DCRT, and Division of Safety for 1984, DRG and Women's Health Initiative for 1993, and CC and OD for all years included in totals only.

a Includes foreign.

b Includes hospitals and basic health-science departments administered by schools of medicine or medicine/dentistry.

e Hospitals administered by institutions of higher education (e.g., Univ. of Texas System's M.D. Anderson Hospital and Tumor Institute). Excludes hospitals administered by medical schools.

Represents awards, not obligations.
 Each supplemental grant is counted separately.
 Supplemental grants are counted only when the parent award is from prior years' funds; such supplements, if multiple, are counted as one.

<sup>&</sup>lt;sup>a</sup> Represents awards, not obligations. Unobligated balances from prior years' awards are carried forward as direct costs and therefore excluded. Also excludes RCPAs, BRS and BRD grants, conference grants, awards to minority student apprentice programs, research centers in minority institutions, education projects, and foreign grants.

b Includes government hospitals and those not owned by institutions shown above.

Source: Information Systems Branch, DRG (Continued)

<sup>&</sup>lt;sup>a</sup> Excludes NLM, DRR, and cancer control research projects. Includes NCRR (starting in FY 1990).
<sup>b</sup> Number awarded as a percentage of the sum of the number of applications reviewed and the number of funded carryovers.

Figure 37.1

### Number of Applications for NIH Competing Research Projects and Number and Dollars of Awards,<sup>a</sup> Fiscal Years 1984–1993

<sup>&</sup>lt;sup>8</sup> Excludes NLM, DRR, and cancer control research projects. Includes NCRR (starting in FY 1990). Represents grants coded R01, R22, R23, R29, R35, R37, R43, R44, P01, P42, and U01, and for NIGMS only, P41. Original applications and their amendments for the same fiscal year are counted as one. As in other award tables, dollar figures represent total costs (direct and indirect). Indirect costs included under "Reviewed" are based on indirect cost rates for each ICD's funded applications in year shown.

<sup>\*</sup> Revised. Based on year of funding. Excludes FIC. "M.D." includes equivalent professional doctorates. "Ph.D." includes equivalent ecedemic doctorates. "M.D. and Ph.D." or equivalent included under "M.D." NOTE: Number of appointments differs from corresponding number of FTTP (see Table 42) because a trainee in a part-time position is counted as a full unit under appointments but as a fraction of a unit under FTTP. In eddition, these data are not strictly comparable with FTTP counts because of somewhet different methods used by the two data sources.

<sup>&</sup>lt;sup>a</sup> Excludes personnel coded as ceiling exempt and student voluntaers.

Source: Division of Personnel Management (Continued)

b Number exceeds FTE because each person is counted as a full unit, whereas under FTE a person in a part-time position is counted as a fraction of a unit. Also includes some staff in without-pay status.

c Excludes staff in without-pay status.

d Includes staff fellows and visiting scientists.

a Includes persons holding both M.D. and Ph.D. or equivalent.

b Deaths classified by year of death.

<sup>&</sup>lt;sup>c</sup> Due to lag time in reporting, 1993 deaths are incomplete.

#### **Technical Notes**

The NIH Data Book (Basic Data Relating to the National Institutes of Health) has been published annually since 1961. The book is prepared within the Office of Strategic Planning and Evaluation, Office of Science Policy and Technology Transfer, Office of the Director. Additional copies of the current issue are available at NIH Information offices.

Rounding error: Detail may not add to totals because of rounding and, where noted, because of data included in totals only.

Revisions: Historical data are often revised.

Supplemental awards: Unless noted, supplemental awards are only counted when the parent award is from prior years' funds, and such supplements, if multiple, are counted as one.

Research training: Training totals, which include all NIH components, are greater than NIH National Research Service Award (NRSA) totals, as the National Library of Medicine does not use the NRSA to support training.

Sources of the data: Data are derived from NIH records and studies unless otherwise noted. OSPE develops the data on national and Federal support for health R&D from annual surveys and other sources. Sources of other information are:

- NIH awards and number of appointments in NIH training programs— Information Systems Branch, DRG;
- NIH obligations, appropriations, and number of full-time-equivalent training positions—Division of Financial Management, OD OA;
- NIH obligations for international programs—Fogarty International Center;

- CRADAs, patents, and licenses—NIH Office of Technology Transfer, OSPTT;
- NIH personnel-Division of Personnel Management, OD OA;
- Prevention-NIH Division of Disease Prevention;
- Nutrition—NIH Division of Nutrition Research Coordination;
- AIDS: numbers of U.S. AIDS cases and numbers of deaths—Centers for Disease Control and Prevention; and
- . Morbidity and mortality statistics—NCHS, with adjustments by NIH.

#### **New NIH components:**

- The Health Research Extension Act of 1985 (P.L. 99-158) created a new National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS), which was formally established on April 8, 1986. P.L. 99-158 designated the remaining components of the former National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases (NIADDK) as the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). The new institutes are shown in obligations tables starting with FY 1986. In trend tables of awards, NIAMS and NIDDK have been projected back to the beginning of the trend period based on the NIADDK programs that were allocated to each new institute.
- P.L. 99-158 also created another new NIH component, at first called the National Center for Nursing Research (NCNR). It appears in trend tables starting in FY 1986 as well. In June of 1993, NCNR was reorganized and renamed the National Institute of Nursing Research (NINR).

#### **Technical Notes (Cont.)**

- The National Institute on Deafness and other Communication Disorders (NIDCD) was created by P.L. 100-553, which was signed into law on October 28, 1988. At that time, the former National Institute of Neurological and Communicative Disorders and Stroke (NINCDS) became the National Institute of Neurological Disorders and Stroke (NINDS). NIDCD and NINDS appear in obligations and appropriations tables starting in FY 1989. In trend tables of awards, NINDS has been projected back to the beginning of the trend period.
- The National Center for Human Genome Research (NCHGR) and the National Center for Research Resources (NCRR) were administratively established in FY 1990. NCRR replaces the old Division of Research Resources (DRR) and Division of Research Services (DRS).

• The ADAMHA Reorganization Act of 1992 (P.L. 102-321) resulted in the reorganization of the Alcohol, Drug Abuse, and Mental Health Administration into the Substance Abuse and Mental Health Services Administration (SAMHSA) and the transfer of its three research institutes into NIH. The bill was passed in July 1992 and took effect in November. The three institutes transferred are the National Institute on Alcohol Abuse and Alcoholism (NIAAA), the National Institute on Drug Abuse (NIDA), and the National Institute of Mental Health (NIMH). Wherever possible in trend tables, they have been included as part of NIH from the beginning of the trend period, so that consistent series are available.

Patricia E. McKinley, Ph.D., Editor

#### **Definitions**

Appropriations—represent an authorization by an act of Congress that permits Federal agencies to incur obligations and to make payments out of the Treasury for specified purposes. An appropriation usually follows enactment of authorizing legislation. Appropriations do not represent cash actually set aside in the Treasury for purposes specified in the appropriation act; they represent limitations of amounts that agencies may obligate during the period of time specified in the respective appropriation acts.

Awards—include R&D grants, contracts, and cooperative agreements, research training grants and fellowships, construction grants, medical library resource grants, and international training grants in epidemiology. See also "Extramural Obligations vs. Awards Reporting."

Biotechnology—1985 definition—any technique that uses living organisms (or parts of organisms) to make or modify products, to improve plants or animals, or to develop microorganisms for specific uses. It includes research involving genetic manipulation, cloning of DNA, use of special techniques to isolate and detect DNA, creation of hybridomas and production of monoclonal antibodies, and computer methods used to analyze DNA and protein sequences. It also includes broad-ranging research in genetics, molecular biology, cell biology, and immunology which underlies new biotechnology.

Biotechnology—1991 definition developed by the OSTP Federal Coordinating Council for Science, Engineering and Technology (FCCSET) Committee on Life Sciences and Health—Biotechnology is broadly defined to include any technique that uses living organisms (or parts of organisms) to make or modify products, to improve plants or animals, or to develop microorganisms for specific use. The development of materials that mimic molecular structures or functions of living systems is included. These data are limited to research directed toward biotechnology, and further to "new biotechnology," i.e., involv-

ing recombinant DNA, DNA transfer techniques, macromolecular structure, cell fusion, bioprocessing, etc.

Cooperative R&D Agreement—an agreement between a Federal laboratory and one or more collaborators (usually private corporations, but may also be State and local governments and nonprofit institutions), who for a designated period of time provide personnel, services, intellectual property, or information toward a jcint research project. As an incentive for participation, the collaborating party may be granted, in advance, an exclusive right to license any resulting invention. The purpose of the CRADA is to make Federal facilities, scientific know-how, and existing intellectual property available for collaborative interactions with industry scientists, and for development of scientific and technological knowledge into useful, marketable products.

Extramural Obligations vs. Awards Reporting—differences between NIH extramural "obligations" and "awards" are caused by differences in the treatment of certain items (cancer control, scientific evaluation, administering vs. funding ICD, etc.) in the accounting methods used. In obligations tables, cancer control is separately identified; in awards tables, it is integrated within various mechanisms. This category accounts for the largest dollar difference between the two. Obligations tables include scientific evaluation grants/ agreements, while awards tables do not. In obligations tables, ICD data are shown under the ICD which received the appropriation; in awards tables, the data are presented under the ICD with the administering responsibility. In obligations tables, FIC international fellowships are classified as research; in awards tables, they are included under training. Obligations tables include NIH interagency agreements (amounts appropriated to NIH but transferred to other Federal agencies for administration), and exclude funds appropriated to other agencies and transferred to NIH for administration. Conversely, awards tables include funds appropriated to other agencies but transferred to and administered by NIH, and exclude NIH interagency agreements.

#### **Definitions (Cont.)**

Health R&D—denotes biomedical, health services and other health-related R&D projects, resources, and general support, but no training or construction. In health R&D series (Tables 1–4), the NIH component contains certain items not classified as research in obligations tables, such as cancer control, portions of NLM and NIH direct operations, and foreign currency funds not directly appropriated to NIH.

Obligations—represent amounts of orders placed, grants, contracts, and cooperative agreements awarded, services received, and similar transactions during a given period that will require payments during the same or a future period; unless otherwise specified, includes both intramural and extramural activities.

Prevention—includes both prevention research and prevention-relevant research. The former is research directly applicable to interventions to prevent disease or to halt the progression of detectable but asymptomatic disease. The latter is research to understand the chain of causation of acute and chronic diseases, and therefore includes relevant basic research efforts.

R&D Contracts—include both intramural and extramural "N01" contracts and SBIR contracts. For NLM, not all contracts support activities that are strictly research.

Research Grants—include research project grants, center grants, and "other research" grants. See Table 32 for classifications. Note that cooperative agreements (U awards) are included under all three of these categories, and that RCPAs (K awards) are included under "other research." Where NIH has been legislatively mandated to support a required number of "research grants," this refers to the total of new, competing continuation, and competing supplemental research project grants.

Research Management and Support—includes management of extramural programs, ODs of ICDs, and some management costs applicable to overall operations.

Scientific Evaluation Grants/Agreements—are grants and cooperative agreements to chairmen of initial review groups, program project committees, training committees, and other review groups to provide funds for the operation of the group. These awards are included in obligations tables, but are excluded from awards tables.

Success Rates—number of competing project grants awarded as a percentage of the sum of the number of applications reviewed and the number of funded carryovers.
